Flow360 is a web-based Facilities Management solution that provides a single portal for management and staff to effectively manage assets, personnel and facilities.

The collaborative and intuitive approach to Facilities Management allows staff to easily record, report and track issues and service requests, seamlessly coordinating with both internal staff and external service providers alike, as and when appropriate.

By adding planned works and relevant documentation to the asset information, organisations can quickly access key information and instantly see what work is due now and in the future. This helps give greater accuracy to budget and personnel planning and ensures that no critical service dates are missed.

This collaborative approach improves efficiency and enables reductions in costs.

## **FLOW360 IS PROVEN TO:**

- Help achieve greater efficiencies in asset management and maintenance
- Ensure Health and Safety compliance & manage risk effectively
- Provide increased visibility of upcoming budget spend leading to significant savings
- Create innovative partnering opportunities through greater co-operation and collaboration
- Provide seamless access for in-house departments and preferred contractors & suppliers
- Allow users to respond quickly to changing environmental and managerial responsibilities
- Streamline the operational management of personnel, ensuring tasks are assigned efficiently and appropriately
- Manage employee training programmes alongside internal and external certifications

Why not contact us today to arrange your free webinar  
and see how Flow360 could help you.
