

In Education • In Business • In Qualifications

Flow360 is a web-based Facilities Management solution that provides a single portal for management and staff to manage assets, personnel and facilities.

The innovative and intuitive approach to Facilities Management allows staff to easily record, report and track issues that occur and seamlessly collaborate with both internal staff and external contractors if and when appropriate.

By adding planned or scheduled works, organisations can quickly see what upcoming work is due, which helps give greater accuracy to budget and personnel planning and ensures that no critical service dates are missed.

This collaborative approach provides far greater staff efficiency and enables reductions in costs through a proactive not reactive approach to management.

Flow 360 is proven to:

- Help achieve **greater efficiencies** in asset management and maintenance
- **Ensure Health and Safety compliance**
- Provide significant **savings** on facilities budgets
- Provide seamless **access** for in-house departments and preferred contractors & suppliers
- Create innovative **partnering** opportunities through greater **co-operation** and **collaboration**
- Allow users to **respond quickly** to changing environmental and managerial responsibilities
- Achieve **Carbon Reduction Commitments** and facilitate reduced energy consumption
- Provide fast **return on investment**

... all in an intuitive, configurable and affordable management solution!
